

Music Matters.

The College Entrance Examination Board found that students involved in public school music programs scored 107 points higher on the SAT's than students with no participation.

Early music training dramatically enhances children's abstract reasoning skills and brain functions required for mathematics, science, and engineering.

Music majors are the most likely group of college grads to be admitted to medical school.

High school music students have been shown to hold higher grade point averages (GPA) than non-musicians in the same school.

Music students receive more academic honors and awards than non-music students.

Studying music strengthens students' academic performance.

Statistics are taken from Children's Music Workshop. Childerensmusicworkshop.com
